

For my logo in the top left I used canvas

1<sup>st</sup> bar graph I used Google charts this chart is interactive (tool tips show when hover)

1<sup>st</sup> animated div is hidden to show must click and the info inside explains 1<sup>st</sup> graph (under 1<sup>st</sup> graph)

2<sup>nd</sup> graph I used a pie chart from chart.js

2<sup>nd</sup> animated div is hidden to show must click and the info inside explains 2<sup>nd</sup> pie chart (under 2<sup>nd</sup> chart)

The design for this site is simple one page layout I wanted it to be more so like an informative blog post not full of image gallery's etc.

The image I used is from flicker search drink the search box went to advanced settings clicked only search creative commons, Find content to use commercially find content to modify, adapt, or build upon and grabbed a image.
